

ASSURSEC is seeking a highly motivated, flexible, organized, customer-focused, and detail-oriented IT Security Specialist. The individual must possess in-depth technical knowledge of IT Security principles and good understanding of NIST Information Assurance Risk Management Framework. You will be responsible for analyzing IT specifications and overall security risk, implementing appropriate security measures, and responding to security breaches.

This position as ASSURSEC offers the ability, for the right individual, to provide consulting support to our Federal Client through operations across Continental USA (CONUS). If you want to learn, grow, and contribute, then this is the job for you. Ability to integrate into the enterprise team environment and work with minimal supervision is essential.

Job Type: Full-Time

What You'll Do

Position Responsibilities:

- Supports the research, development, implementation, testing and review of Kennedy Space Center's (KSC) information security in order to protect information and prevent unauthorized impact
- Conducts assessment and accreditation, continuous monitoring, and supports information security initiatives in safeguarding NASA information and IT by applying agency information protection requirements, policies, processes, and procedures, and their interdependencies
- Supervise lower-level IT Security Specialists
- Performs all procedures necessary to ensure the safety of information, systems assets and to protect systems from intentional or inadvertent access or destruction
- Interfaces with user community to understand their security needs and implements procedures to accommodate them
- Uses reporting tools to perform forensic analyses of system, application, and event audit logs

Travel Requirements:

- Occasional

Location:

- Kennedy Space Center, Florida

Qualifications

Experience/Skills:

- 4 to 10 years in the field and relevant related IT functional areas
- Experience in conducting risk assessments and impact analysis of IT systems and IT security infrastructure.
- Proven background in IT Security technology functional areas. Experience with commonly used computer operating systems, networking technologies, system administration techniques, and familiarity with basic scripting languages.
- Familiarity with Government IT Security policies and processes (such as the NIST 800-53 family of controls) is highly desirable.

Certifications:

- Ability to get CompTIA Security +

Education:

- Technical Associates/Undergraduate degree in IT related field or
- Equivalent relevant experience (preferred)

Clearance:

- Minimum of Public Trust
